

## Our Commitment to Inclusive Production

We're excited to share that we're working with **Inclusively Made** to ensure your upcoming production is authentically inclusive and represents the diverse world we live in.

### What This Means

People with disability make up 1 in 5 of the population, yet this diversity is significantly underrepresented in screen content. We believe in being part of the solution and creating content that truly reflects our diverse society.

As part of our commitment to inclusive production, we work closely with Inclusively Made to ensure people with disability are authentically represented both in front of and behind the camera across our productions.

### What We'll Do

**Develop an Inclusion Plan:** With Inclusively Made's support, we'll create and execute a comprehensive inclusion plan for your production

**Handle Certification:** We'll lead the certification process and work directly with Inclusively Made throughout

**Showcase the Achievement:** With your approval, we'll include the Inclusively Made ident to proudly demonstrate that your production was certified Inclusively Made.

### What You Need to Do

Nothing! We'll take care of everything. This is our commitment to creating authentic, more representative content, and we're handling the entire process.

**Thank you for your support to create productions that authentically represent and include people with disability, contributing to a more inclusive media landscape for everyone.**
